Chairman's Statement

Dear Shareholders,

In the first half of 2008, the economy of China overcame difficulties caused by unfavorable international economic conditions and domestic severe natural disasters. The national economy continued developing in line with the macro-economic control measures. Major coal consuming industries maintained relatively fast growth. Coal market demand was strong and the supply of coal, electricity, oil and transportation services continued to remain tight. China Coal Energy Company Limited (the "Company" or "China Coal Energy") leveraged the advantages of being an energy giant, strived to increase coal production, improved its sales structure, strictly controlled cost, actively performed social responsibilities and endeavored to ensure the supply of coal to key users. Accordingly, the Company's production and operation progressed smoothly and satisfactory operating results were achieved.

SIGNIFICANT GROWTH IN OPERATING RESULTS ON A SUSTAINED BASIS

During the reporting period, the operating revenue of the Company was RMB26.408 billion, representing an increase of 58.0% over the same period last year, of which revenue from coal operations was RMB18.473 billion, representing an increase of 54.1% over the same period last year. Gross profit was RMB8.031 billion, representing an increase of 83.5% over the same period last year, of which gross profit from coal operations was RMB6.900 billion, representing an increase of 87.9% over the same period last year. Profit before interest, tax, depreciation and amortization was RMB7.537 billion, representing an increase of 62.6% over the same period last year; profit before income tax was RMB6.347 billion, representing an increase of 74.4% over the same period last year. If the impact of gains and losses from the fair value changes of shares were excluded, profit before income tax would have been RMB7.263 billion, representing an increase of 123.5% over the same period last year. Profit attributable to equity holders of the Company was RMB4.219 billion, representing an increase of 59.3% over the same period last year. Basic earnings per share was RMB0.32, representing an increase of 39.1% over the same period last year; the rate of return on the shareholders' equity was 10.1%.

Continued growth in coal production and sales. Raw coal production was 49.98 million tons, representing an increase of 15.2% over the same period last year, of which self-produced raw coal accounted for 46.34 million tons, representing an increase of 18.7% over the same period last year. Sales of commercial coal was 46.01 million tons, representing an increase of 10.4% over the same period last year, of which sales of self-produced commercial coal was 38.15 million tons, representing an increase of 12.8% over the same period last year. Coal export volume amounted to 8.92 million tons, of which exports of self-produced commercial coal amounted to 3.23 million tons. While actively implementing the State's policy of ensuring the supply of thermal coal and the steady supply of thermal coal to key users in the country, the Company seized the favorable opportunity of sustained increase in prices in the spot market and increased the proportion of spot sales appropriately in respect of the additional output. In the first half of the year, long-term coal contract sales accounted for 75.6% while spot sales accounted for 24.4%.

Coal prices hovering at high levels. During the reporting period, the average coal sales price of the Company was RMB455/ton, representing an increase of RMB114/ton or 33.6% over the same period last year, of which the average export price of self-produced thermal coal was RMB672/ton, representing an increase of RMB207/ton or 44.5% over the same period last year; the average domestic sales price of self-produced thermal coal was RMB407/ton, representing an increase of RMB79/ton or 24.1% over the same period last year. The average sales price of long-term contracts for self-produced thermal coal was RMB363/ton, representing an increase of RMB44/ton or 13.8% over the same period last year. The average domestic spot price of self-produced thermal coal was RMB596/ton.

Cost of coal was under effective control. By strengthening refined management, strictly controlling on unit consumption and fully capitalizing on economy of scale, the Company still managed to effectively control coal production cost amid unfavorable conditions such as a sharp increase in raw material prices and rising labour cost. During the reporting period, the unit production cost of self-produced raw coal was RMB94.97/ton, representing an increase of RMB5.88/ton over the same period last year. The unit sales cost of self-produced commercial coal was RMB277.01/ton, representing an increase of RMB43.79/ton over the same period last year. If the impact of policy-related cost increase such as Coal Sustainable Development Fund levied by the Shanxi Province were excluded, the cost of raw coal would have increased by RMB2.87/ton showing remarkable results achieved in cost control. The increase in the unit cost of self-produced commercial coal was mainly attributable to the increased external purchase of coal for washing purpose and a rise in the prices of feed coal for washing plants.

Growth in the operating results of coking operations doubled. Seizing the favorable opportunities presented by strong demand in domestic and overseas coke markets and the significant increase in price, the Company fully capitalized the production capacities of coke to double the yield. During the reporting period, production of coke amounted to 2.21 million tons, representing an increase of 40.8% over the same period last year. Sales of coke amounted to 2.04 million tons, representing an increase of 7.9% over the same period last year, of which sales of self-produced coke amounted to 1.67 million tons, representing an increase of 23.7% over the same period last year.

Coking operations recorded a revenue of RMB4.478 billion, representing an increase of 110.9% over the same period last year, and gross profit of RMB726 million, representing an increase of 236.1% over the same period last year. During the reporting period, average sales price of coke was RMB2,102/ton, representing an increase of 97.4%, or 12.8 percentage points higher than the growth rate of the purchase price of raw coal. Of these, average price for domestic sales was RMB1,889/ton, representing an increase of 99.9%, and average export price was RMB3,067/ton, representing an increase of 117.7%.

Coal mining equipment operations maintained the leading position in the industry. Contracted values in the first half of the year amounted to RMB3.02 billion, representing an increase of 58.4% over the same period last year. Production of coal mining equipment amounted to 114,000 tons, representing an increase of 17.5% over the same period last year, and key products of coal mining equipment amounted to 8,145 units (sets). The Company has succeeded in the development of SGZ1000/3x700 series armored face conveyor systems for working faces of highly efficient mines which has the characteristics of high installed power, large conveying capacity, long conveying distance and high reliability. Currently, the equipment has been examined by experts and has reached international advanced level, and filled a market blank of such products in domestic market. Market shares of high-end products have been affirmed and enhanced. High-end hydraulic roof supports, armored face conveyors and explosion-proof electric mining motor continued to maintain their leading positions domestically with market shares reaching 35%, 50% and 70%, respectively.

The market share of coal mining equipment operations has increased through the sales of major equipment to drive sales of coal mining equipment components and greatly enhanced added values of products. During the reporting period, coal mining equipment operations recorded a sales revenue of RMB2.242 billion, representing an increase of 37.1% over the same period last year, and a gross profit of RMB363 million, representing an increase of 30.6% over the same period last year.

MAKING EFFORTS IN PROMOTING CONSTRUCTION OF INVESTMENT PROJECTS

In recent years, the State continued to strengthen its policy control on projects investment, and enhanced investment thresholds with respect to land use and environmental protection. Substantial preliminary work has to be done for large investment projects, which are relatively time consuming. China Coal Energy has overcome various difficulties and made great efforts in promoting construction of investment projects.

Significant progress for large coal mine construction projects. The Pingshuo East open pit mine project has obtained approvals from National Development and Reform Commission in April this year, project design work has been progressing smoothly, land requisition and application for mining rights commenced concurrently, and construction works were commenced in early June. The water prevention work in Antaibao underground mine was satisfactory, and all core works of the mine have been basically completed. Construction work of the initial mining face and related preparation work are being accelerated at the moment, and the operation will be strived to commence within this year. Construction project of Wangjialing Coal Mine within the Huajin Mining Area is progressing smoothly. To coordinate development of the Company's coal resources in Xinjiang region, the Company has established China Coal Xinjiang Branch to expedite promotion of the resources in Zhundong Zhangnan Mining Area, Xinjiang Tielieke Coal Mine, as well as the development of 106# Coal Mine (1.8 million tons/year of coal) in cooperation with Agricultural Division 6, and the 2x135MW combined heat power project.

Solid progress in preliminary work for coal chemical projects. Appraisals of and amendments to the feasibility studies on the coal project and chemical project of the Coal Chemical project in Erdos, Inner Mongolia have been completed, and formalities for the transfer of prospecting rights of the Menkeqing Coal Field is currently proceeding. Negotiation on the transfer of prospecting rights of the Hulusu Coal Field is also under way while related studies on the safety, environment, water resources are also being carried out. As to the Heilongjiang Coal Chemical project, preparatory work has commenced in accordance with the requirements in the "Notice relating to the commencement of preparation work for methanol projects of 1.8 million tons/year and olefin projects of 600,000 tons/year" issued by NDRC. The main project of the 250,000 tons/year methanol project of China Coal Energy Heilongjiang Coal Chemical Co., Ltd. has been completed, and is anticipated to commence operation by the end of this year.

TIMELY ACQUISITION OF THE PARENT COMPANY'S ASSETS

Shanxi China Coal Dongpo Coal Company Limited ("Dongpo Coal") which is restructured and integrated by China National Coal Group Corporation ("China Coal Group"), the controlling shareholder of the Company, has obtained approval for a production capacity of 1.5 million tons/year, while the main engineering of the shaft system is based on the design and construction of the scope of 3 million tons/year. The mine has an area of 4.6 square kilometers and reserves of 158 million tons already being filed with the government. The resources are high quality thermal coal. Its mining conditions are good and transportation is convenient. The resolution for the acquisition of its entire equity interests has been considered and approved by the shareholders' general meeting of the Company, and currently the acquisition has been approved by State-owned Assets Supervision and Administration Commission of the State Council ("SASAC"). Designated by Shanxi Province as one of the state-owned key coal mines to carry out the restructuring of locally-owned coal mines, Pingshuo Company is actively participating in the integration of resources with the local coal mines in the Shuozhou Area. China Coal Group, the Company's controlling shareholder, is actively promoting the integration and restructuring of local coal mines in places like Xishahe, Danshuigou and Yangjian. When conditions are ripe, the Company will decide whether to exercise options to acquire related assets in accordance with the regulatory procedures.

In addition, China United Coalbed Methane Corporation Ltd., a 50%-owned company of China Coal Group, the Company's controlling shareholder, has abundant coal gas resources with good mining conditions and advanced technology. PetroChina Company Limited has commenced the transfer of its shareholdings in China United Coalbed Methane Corporation Ltd. to China Coal Group and China United Coalbed Methane Corporation Ltd. will become a wholly-owned subsidiary of China Coal Group upon completion. When conditions are ripe, the Company will decide whether to exercise options to acquire related assets in accordance with the regulatory procedures.

ACTIVE FULFILLMENT OF SOCIAL RESPONSIBILITIES

At the beginning of the year, parts of southern China were affected by blizzards and extreme cold spells. In May, a severe earthquake struck Wenchuan County of Sichuan Province. China Coal Energy performed social responsibilities by participating actively in the rescue and relief work and ensuring the stable supply of thermal coal to power plants, striving to promote the harmonious development of the enterprise, society and environment.

During the Chinese Spring Festival, when most parts of southern China were affected by blizzards and extreme cold spells, China Coal Energy's coal producing mines maintained normal production during the holiday period and made its best efforts to increase the coal production, which contributed significantly to the alleviation of the tight thermal coal supply. From 1st to 21st of February when thermal coal transportation was strengthened, China Coal Energy had produced a total of 5.96 million tons, representing an increase of 1.20 million tons over the same period last year. Sales of thermal coal amounted to 4.497 million tons, of which 2.121 million tons were supplied to the top five power generation companies, achieving 160% of the scheduled progress and ensuring the coal supply to key thermal coal users. Accordingly, China Coal Energy was widely acclaimed by the relevant government authorities and the clients. During the first half of 2008, the Company's performance rate of key thermal coal contracts was 110%, which helped to stabilize the domestic thermal coal supply.

In May, when Sichuan Province was affected by a severe earthquake, the Company immediately organized staff donation for the devastated areas, while the Pingshuo Branch actively commenced the rescue and relief work by delegating 36 Commando members and deploying 17 units/sets of equipment to head for Jiange county of Sichuan Province. China Coal Group, the controlling shareholder, donated an aggregate of RMB37.04 million and sent three specialized teams to the devastated areas for the reconstruction work. 32,200 square meters of land area were cleared and leveled, unsafe buildings over 15,700 square metres were demolished and 893 units of transition housing with gross floor area of 19,072 square meters were installed for occupation by residents.

China Coal Energy has been actively implementing the State's policy of energy conservation and discharge reduction, and strived to transform the Company into a resources-efficient and environment-friendly enterprise. During the reporting period, solid results were obtained in terms of energy conservation and discharge reduction. The rate of fatality per million tons of raw coal produced by the Company was 0.02. The integrated energy consumption per RMB10,000 of production value of the Company was decreased by 6.9%, the discharge volume of sulphur dioxide was reduced by 2.7%, and the discharge volume of COD was reduced by 10.67% when compared with the same period last year.

MAJOR TASKS IN THE SECOND HALF OF THE YEAR

In the second half of the year, with national economy maintaining a stable and fast growth, demand from major coal consuming industries such as thermal power, steel, construction materials and chemical industries will also have considerable growth. Especially in the summer peak seasons, supplies from coal market are still relatively tight due to coal supply and transportation distribution. China Coal Energy will endeavor to expand its production and sales volumes, speed up project construction, strengthen cost control, and continue to enhance economic benefits of the Company. The following tasks shall be emphasized:

-- Strive to increase coal production to achieve the target of over one hundred million tons in annual production and trading volume.

The Company will keep on strengthening technology management of coal production to ensure coal production in an orderly and stable manner. Coordination between open pit stripping and underground excavation will be focused to advance the excess quantities in overburden removal and underground roadheading to satisfy the continuous and steady growth of mining capacity. The progress of integrating newly constructed projects and joint local mines will be accelerated so as to achieve the coal production growth target of the Company. The Company will continue to utilize its marketing advantage and, subject to the supply of thermal coal, will further optimize the sales structure and improve the delivery and sales of coal products.

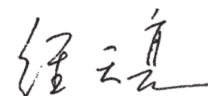

-- Make efforts to promote the construction of investment projects to enhance the Company's future development.

The Company will make efforts to promote the construction of Pingshuo East open pit mine project so as to lay a solid foundation of future production growth. Preliminary work for major coal chemical projects will be actively conducted. The project documents relating to mining area comprehensive plan, ground and environmental evaluation for the coal chemical project in Erdos, Inner Mongolia will be submitted to the competent authority and all related preparations for the construction commencement will be ready by the end of 2008. Further preliminary work will be conducted for the coal chemical project in Heilongjiang.

-- Stringent control of unit consumption and increased efforts to eliminate factors for cost increase.

In June 2008, there was an adjustment to the prices of oil products and electricity at the national level. As estimated, this adjustment to oil products and electricity prices will directly result in an increase in the unit cost of the Company's raw coal production of about RMB1.2/ton. As such, price increase of raw materials and energy resources due to price adjustment for oil products and electricity will further exert pressure on the Company's cost control. In the second half of the year, the Company will implement stringent control of unit consumption level and initiate conservation activities to offset those cost increase factors such as price increase of oil products, electricity and raw materials so as to ensure the achievement of the Company's annual performance target.

China Coal Energy will continue to maximize its own advantages in the second half of the year, to manage and control the production and operation, to accelerate the progress of projects under construction, to promote the construction of an essentially safe enterprise, to perform actively the social responsibilities, to put emphasis on energy conservation and emission reduction, to realize fully the production and operation targets for 2008, and to generate excellent returns for shareholders.

The following discussions and analysis should be read in conjunction with the Group's reviewed financial statements and the notes as set out in this report. The Group's financial statements have been prepared in accordance with International Financial Reporting Standards.

I. Overview

For the six months ended 30 June 2008, the Group's total revenues net of inter-segment sales amounted to RMB26.408 billion, representing an increase of 58.0% over the same period last year; profit before income tax was RMB6.347 billion, representing an increase of 74.4% over the same period last year; profit attributable to equity holders of the Company was RMB4.219 billion, representing an increase of 59.3% over the same period last year; basic earnings per share of the Company was RMB0.32, representing an increase of RMB0.09 over the same period last year. The profitability of the Group continued to grow substantially, and the Group continued to present impressive performance results and demonstrate development trends through its efforts in expanding production volume of coal and other key products, strictly exerting cost control, expanding sales volume actively to satisfy market needs.

For the six months ended 30 June 2008, the Group's three major business segments, namely coal, coking and coal mining equipment operations, all recorded a substantial increase in profit. The operating profit of coal operations increased by 112.2% from RMB2.977 billion for the six months ended 30 June 2007 to RMB6.316 billion. The operating profit of coking operations increased by 586.8% from RMB91 million to RMB625 million; and operating profit of coal mining equipment operations increased by 44.4% from RMB135 million to RMB195 million.

For the six months ended 30 June 2008, the Group's EBITDA increased by 62.6% from RMB4.635 billion for the six months ended 30 June 2007 to RMB7.537 billion. The Group's gearing ratio (total interest bearing liabilities/(total interest bearing liabilities + shareholders' interest)) was 15.6%.

II. Operating Results

1. Revenues

(1) Consolidated revenues

For the six months ended 30 June 2008, the Group's total revenues net of inter-segment sales increased by 58.0% from RMB16.716 billion for the six months ended 30 June 2007 to RMB26.408 billion. Sales revenue from the three core businesses of coal, coking and coal mining equipment operations all realized relatively significant growth.

Changes on revenues (net of inter-segment sales) from the Group's four business segments of coal, coking, coal mining equipment and other operations for the six months ended 30 June 2008 and 30 June 2007 were as follows:

	Revenues net of inter-segment sales		Increase/decrease	
	For the six months ended 30 June 2008 RMB100 million	For the six months ended 30 June 2007 RMB100 million	RMB100 million	%
Coal operations	184.73	119.90	64.83	54.1
Coking operations	44.78	21.23	23.55	110.9
Coal mining equipment operations	20.70	14.34	6.36	44.4
Other operations	13.87	11.69	2.18	18.6
Total	264.08	167.16	96.92	58.0

The proportion of revenue (net of inter-segment sales) of the various business segments of the Group for the six months ended 30 June 2008 and for the six months ended 30 June 2007 were as follows:

(2) Segmental revenues

- Coal operations

For the six months ended 30 June 2008, the total revenue from coal operations increased from RMB12.080 billion for the six months ended 30 June 2007 to RMB18.780 billion, representing an increase of 55.5% (of which, the revenue net of other inter-segment sales increased from RMB11.990 billion for the six months ended 30 June 2007 to RMB18.473 billion, representing an increase of 54.1%).

Revenue from the Group's coal operations was mainly due to sales of coal produced from its own coal mines and coal washing plants (sales of self-produced commercial coal) to domestic and overseas customers. In addition, the Group also purchased coal from external coal enterprises for re-sale to customers (proprietary coal trading) and provided coal import and export agency services. The major coal products of the Group were thermal coal and coking coal.

For the six months ended 30 June 2008, the Group's revenue from self-produced commercial coal sales was RMB17.046 billion, representing an increase of RMB5.615 billion or 49.1% over the same period last year, of which revenue from domestic sales of self-produced commercial coal was RMB14.863 billion, representing an increase of RMB4.656 billion or 45.6% over the same period last year; revenue from export sales of self-produced commercial coal was RMB2.183 billion, representing an increase of RMB959 million or 78.3% over the same period last year. Revenue from proprietary coal trading of the Group for the same period was RMB1.362 billion, representing an increase of RMB847 million or 164.5% over the same period last year.

For the six months ended 30 June 2008, revenue from the Group's coal import and export agency services was RMB65 million (the revenue in this reporting period was all from export agency services), representing an increase of RMB21 million or 47.7% over the same period last year. The average agency fee increased from RMB7/ton to RMB12/ton over the same period last year.

Management Discussion and Analysis of Financial Conditions and Operating Results

The Group's coal sales volume and prices for the six months ended 30 June 2008 and for the six months ended 30 June 2007 were compared as follows:

- Coking operations

Revenue from coking operations increased from RMB2.123 billion for the six months ended 30 June 2007 to RMB4.478 billion for the six months ended 30 June 2008, representing an increase of 110.9%. The increase was mainly attributable to an increase in the sales volume of self-produced coke as a result of the increase in the production volume of coke produced by the Group's coke plants as well as the significant increase in the selling price of coke.

Revenue from the Group's coking operations was mainly derived from the sales of coke produced from self-owned coke plants (sales of self-produced coke) to domestic and overseas customers. In addition, the Group also purchased coke from external coke enterprises for re-sale to customers (proprietary coke trading).

Sales volume of coke for the six months ended 30 June 2008 amounted to 2.04 million tons, representing an increase of 0.15 million tons or 7.9% over the same period last year, of which the sales volume of self-produced coke amounted to 1.67 million tons, representing an increase of 0.32 million tons or 23.7% over the same period last year.

For the six months ended 30 June 2008, the average sales price of coke was RMB2,102/ton, representing an increase of RMB1,037/ton over the same period of 2007, of which the average domestic sales price of coke was RMB1,889/ton, representing an increase of RMB944/ton over the same period of 2007; the average export sales price of coke was RMB3,067/ton, representing an increase of RMB1,658/ton over the same period of 2007.

- Coal mining equipment operations

Revenue from the coal mining equipment operations increased from RMB1.635 billion for the six months ended 30 June 2007 to RMB2.242 billion for the six months ended 30 June 2008, representing an increase of 37.1% (of which revenue net of other inter-segment sales increased from RMB1.434 billion for the six months ended 30 June 2007 to RMB2.070 billion for the same period in 2008, representing an increase of 44.4%). The increase was mainly attributable to the expansion on production scale, enhancement of technology level and improvement in product mix, which further increased the production and sales volume of coal mining equipment products and the proportion of high-end products.

- Other operations

For the six months ended 30 June 2008, the Group's total revenue from other operations such as sales of primary aluminum, power and the provision of coal mine design services increased from RMB1.475 billion for the six months ended 30 June 2007 to RMB1.618 billion, representing an increase of 9.7% (of which revenue net of other inter-segment sales increased from RMB1.169 billion for the six months ended 30 June 2007 to RMB1.387 billion, representing an increase of 18.6%).

2. Cost of sales

(1) Consolidated cost of sales

For the six months ended 30 June 2008, the Group's cost of sales increased from RMB12.339 billion for the six months ended 30 June 2007 to RMB18.377 billion, representing an increase of 48.9%, which was 9.1 percentage points lower than the increase in revenue for the same period in 2008. Changes in major items of cost of sales were as follows:

Materials costs increased from RMB5.929 billion for the six months ended 30 June 2007 to RMB9.740 billion, representing an increase of 64.3%. The increase was mainly attributable to the increase in production and sales volume and the increase in the prices of raw materials.

Staff costs increased from RMB877 million for the six months ended 30 June 2007 to RMB1.322 billion, representing an increase of 50.7%. The increase was mainly attributable to the Group's expansion on production capacity and operation scale, which resulted in the corresponding increase in staff costs.

Depreciation and amortization expenses increased from RMB566 million for the six months ended 30 June 2007 to RMB675 million, representing an increase of 19.3%. The increase was mainly attributable to the Group's application of new production equipment to expand production capacity, which resulted in the corresponding increase in depreciation expenses.

Repair and maintenance costs increased from RMB344 million for the six months ended 30 June 2007 to RMB384 million, representing an increase of 11.6%. The increase was mainly attributable to an increase in the Group's maintenance expenses for keeping the machinery and equipment in good condition.

Transportation costs increased from RMB3.019 billion for the six months ended 30 June 2007 to RMB3.707 billion, representing an increase of 22.8%. The increase was mainly attributable to an increase in the Group's sales volume of self-produced coal and the corresponding increase in the coal volume transported.

Sales taxes and surcharges increased from RMB281 million for the six months ended 30 June 2007 to RMB587 million, representing an increase of 108.9%. The increase was mainly attributable to an increase in the Group's sales volumes and operating revenue.

Other expenses increased from RMB1.323 billion for the six months ended 30 June 2007 to RMB1.962 billion, representing an increase of 48.3%. The increase was mainly attributable to an increase in the Group's production and sales volume, which resulted in a corresponding increase in other related expenses, of which the Coal Sustainable Development Fund levied by Shanxi Province to coal production enterprises commencing from March 2007 resulted in the cost increase of RMB196 million over the same period of 2007.

(2) Segmental cost of sales

- Coal operations

Cost of sales for the Group's coal operations increased from RMB8.408 billion for the six months ended 30 June 2007 to RMB11.880 billion for the six months ended 30 June 2008, representing an increase of 41.3%. Changes in the major cost items were compared as follows:

	For the six months ended 30 June 2008 RMB100 million	For the six months ended 30 June 2007 RMB100 million	Increase/decrease RMB100 million	%
Materials	46.75	27.63	19.12	69.2
Staff costs	10.07	6.98	3.09	44.3
Depreciation and amortization	4.91	4.13	0.78	18.9
Repair and maintenance	3.31	3.09	0.22	7.1
Transportation costs	33.77	28.82	4.95	17.2
Others	19.99	13.43	6.56	48.8
Cost of sales of coal operations	118.80	84.08	34.72	41.3

For the six months ended 30 June 2008, the Group's cost of sales of self-produced commercial coal was RMB10.567 billion, representing an increase of RMB2.679 billion or 34.0% over the same period of 2007. Unit sales cost of self-produced commercial coal was RMB277.01/ton, representing an increase of RMB43.79/ton or 18.8% over the same period of 2007. The Coal Sustainable Development Fund levied by Shanxi Province since March 2007 had driven up the Group's unit cost of sales of self-produced commercial coal by RMB4.03/ton. In the case that such policy-related cost increase were excluded, the Group's unit cost of sales of self-produced commercial coal for the six months ended 30 June 2008 would have increased by RMB39.76/ton or 17.8% over the same period of 2007.

Management Discussion and Analysis of Financial Conditions and Operating Results

The major items of the Group's unit cost of sales of self-produced commercial coal for the six months ended 30 June 2008 and the six months ended 30 June 2007 were compared as follows:

	For the six months ended 30 June 2008 RMB/ton	For the six months ended 30 June 2007 RMB/ton	Increase/decrease RMB/ton	%
Production cost	188.48	150.52	37.96	25.2
Materials	88.13	68.80	19.33	28.1
Staff costs	26.41	20.65	5.76	27.9
Depreciation and amortization	12.88	12.22	0.66	5.4
Repair and maintenance	8.69	9.14	-0.45	-4.9
Others	52.37	39.71	12.66	31.9
Transportation cost	88.53	82.70	5.83	7.0
Sales cost of self-produced commercial coal	277.01	233.22	43.79	18.8

For the six months ended 30 June 2008, the Group's unit production cost of self-produced raw coal was RMB94.97/ton, representing an increase of RMB5.88/ton compared to RMB89.09/ton for the six months ended 30 June 2007. Due to the Coal Sustainable Development Fund levied by Shanxi Province since 1 March 2007, unit production cost of self-produced raw coal increased by RMB3.01/ton. In case such policy-related cost increase were excluded, the unit production cost of self-produced raw coal would have increased by RMB2.87/ton compared to the same period last year.

- Coking operations

The cost of sales of coking operations increased from RMB1.907 billion for the six months ended 30 June 2007 to RMB3.752 billion for the six months ended 30 June 2008, representing an increase of 96.7%. The increase was mainly attributable to the expansion of the sales volume of coke products and price increase of coal and other raw materials. The unit cost of coke sales was RMB1,530/ton, representing an increase of RMB627/ton over the same period last year.

- Coal mining equipment operations

The cost of sales of coal mining equipment operations increased from RMB1.357 billion for the six months ended 30 June 2007 to RMB1.879 billion for the six months ended 30 June 2008, representing an increase of 38.5%. The increase was mainly attributable to an increase in production and sales volume of coal mining equipment products and an increase in the prices of steel and other raw materials.

3. Gross profit

(1) Consolidated

For the six months ended 30 June 2008, the Group's gross profit increased from RMB4.377 billion for the six months ended 30 June 2007 to 8.031 billion, representing an increase of 83.5%. The Group's gross profit margin increased from 26.2% for the six months ended 30 June 2007 to 30.4%, representing an increase of 4.2 percentage points.

The Group's gross profit and gross profit margin of the four business segments of coal, coking, coal mining equipment and other operations for the six months ended 30 June 2008 and for the six months ended 30 June 2007 were as follows:

	Gross profit			Gross profit margin		
	For the six months ended 30 June 2008 RMB100 million	For the six months ended 30 June 2007 RMB100 million	Increase/decrease RMB100 million	For the six months ended 30 June 2008 %	For the six months ended 30 June 2007 %	Increase/decrease percentage point(s)
Coal operations	69.00	36.72	32.28	36.7	30.4	6.3
Coking operations	7.26	2.16	5.1	16.2	10.2	6.0
Coal mining equipment operations	3.63	2.78	0.85	16.2	17.0	-0.8
Other operations	0.29	2.34	-2.05	1.8	15.9	-14.1

Note: The above gross profit and gross profit margin of each of the four segments are the data before eliminating inter-segment sales.

(2) Segmental gross profit of major operations

- Coal operations

For the six months ended 30 June 2008, gross profit from coal operations increased from RMB3.672 billion for the six months ended 30 June 2007 to RMB6.900 billion, representing an increase of 87.9%. Gross profit margin increased from 30.4% for the six months ended 30 June 2007 to 36.7%, representing an increase of 6.3 percentage points.

The increase in gross profit of coal operations was mainly attributable to the expansion of sales volume of the Group and the increase in selling price of self-produced coal, as well as the strict control of costs, which effectively off-set the impact caused by policy-related cost increase and price increase of raw materials, whereby further strengthened the profitability of the coal operations; gross profit margin for the sales of self-produced commercial coal increased from 31.0% for the six months ended 30 June 2007 to 38.0% for the same period 2008. Gross profit margin for proprietary coal trading was 3.6% for the six months ended 30 June 2008.

- Coking operations

For the six months ended 30 June 2008, gross profit from the Group's coking operations increased from RMB216 million for the six months ended 30 June 2007 to RMB726 million, representing an increase of 236.1%. Gross profit margin increased from 10.2% for the six months ended 30 June 2007 to 16.2%, representing an increase of 6.0 percentage points.

The increase in gross profit of coking operations was mainly attributable to the increase of sales of coke resulted from expansion on production capacity and the increase in the prices of coke.

- Coal mining equipment operations

For the six months ended 30 June 2008, gross profit from the Group's coal mining equipment operations increased from RMB278 million for the six months ended 30 June 2007 to RMB363 million, representing an increase of 30.6%. Gross profit margin decreased from 17.0% for the six months ended 30 June 2007 to 16.2%, representing a decrease of 0.8 percentage point.

4. Selling, general and administrative expenses

For the six months ended 30 June 2008, the Group's selling, general and administrative expenses increased from RMB1.127 billion for the six months ended 30 June 2007 to RMB1.349 billion, representing an increase of 19.7%. The increase was mainly attributable to the expansion on the Group's production capacity and operation scale and the corresponding increase in selling and administrative expenses.

5. (Loss)/Gain from fair value changes of other financial assets

For the six months ended 30 June 2008, the Group incurred a loss of RMB916 million due to the change in the fair value of the A shares of China COSCO Holdings Company Limited ("COSCO") held by the Group. As at 30 June 2008, the closing price of the shares was RMB19.75/share, decreased by RMB22.91/share as compared to the closing price of RMB42.66/share as at 28 December 2007 (Friday), whereby the Group recognized a loss of RMB916 million from the change in the fair value of COSCO shares.

6. Other income

For the six months ended 30 June 2008, the Group's other income increased from RMB299 million for the six months ended 30 June 2007 to RMB701 million, representing an increase of 134.4%. The increase was mainly attributable to the increase in the Group's interest of term deposits.

7. Profit from operations

The Group's profit from operations increased from RMB3.959 billion for the six months ended 30 June 2007 to RMB6.785 billion for the six months ended 30 June 2008, representing an increase of 71.4%.

8. Finance costs, net

The Group's net finance costs increased from RMB325 million for the six months ended 30 June 2007 to RMB442 million for the six months ended 30 June 2008, representing an increase of 36.0%, which was mainly due to the foreign exchange losses generated from the Group's bank deposits and receivables dominated in USD.

9. Profit before income tax

The Group's profit before income tax increased from RMB3.640 billion for the six months ended 30 June 2007 to RMB6.347 billion for the six months ended 30 June in 2008, representing an increase of 74.4%.

10. Income tax

The Group's income tax expenses increased from RMB755 million for the six months ended 30 June 2007 to RMB1.522 billion for the six months ended 30 June 2008, representing an increase of 101.6%, which was mainly attributable to an increase in taxable income.

11. Profit attributable to equity holders of the Company

Profit attributable to equity holders of the Company increased from RMB2.649 billion for the six months ended 30 June 2007 to RMB4.219 billion for the six months ended 30 June 2008, representing an increase of 59.3%.

III. Cash Flow

As at 30 June 2008, the Group had cash and cash equivalents amounting to RMB11.078 billion, a net increase of RMB6.744 billion as compared to the cash and cash equivalents of RMB4.334 billion as at 1 January 2008.

Net cash generated from operating activities increased from RMB1.195 billion for the six months ended 30 June 2007 to RMB5.493 billion for the six months ended 30 June 2008, representing an increase of 359.7%. This was mainly attributable to an increase in sales volume and a higher profitability level, which resulted in cash inflows generated from operating activities increased substantially.

Net cash used in investing activities increased from RMB13.147 billion for the six months ended 30 June 2007 to RMB24.364 billion for the six months ended 30 June 2008. This was mainly attributable to an increase in the capital expenditures and an increase of term deposits with initial term of over three months.

Net cash generated from financing activities for the six months ended 30 June 2008 was RMB25.661 billion, which was mainly attributable to an increase of funds inflow raised from issuance of A shares; whereas a net cash outflow of RMB1.716 billion was recorded for the six months ended 30 June 2007.

IV. Liquidity and Sources of Capital

For the six months ended 30 June 2008, the main sources of capital for the Group were the net funds generated from operations, the proceeds raised from the issuance of H shares and A shares, bank borrowings. Capital of the Group was mainly applied in the investment of production facilities and equipment for coal, coal chemical and coal mining equipment operations, repayment of the Group's debts, and as working capital and paying general operating expenses of the Group.

The Group's cash flow generated from operations, the proceeds raised from the issuance of H shares and A shares and the credit facilities granted by relevant banks are sufficient to finance production activities and project constructions in the future.

V. Assets and Liabilities

1. Property, plant and equipment

The net value of property, plant and equipment of the Group increased from RMB21.917 billion as at 31 December 2007 to RMB24.448 billion as at 30 June 2008, representing an increase of 2.531 billion or 11.5%.

2. Trade and note receivables

As at 30 June 2008, the balance of trade and note receivables of the Group amounted to RMB6.524 billion, representing an increase of RMB2.152 billion or 49.2% compared to the balance of RMB4.372 billion as at 31 December 2007, which was mainly attributable to the continuous increase in the Group's sales volume.

3. Borrowings

As at 30 June 2008, the borrowings of the Group amounted to RMB10.370 billion, representing an increase of RMB419 million compared to RMB9.951 billion as at 31 December 2007. Of which, the balance of the long-term borrowings was RMB9.144 billion, representing an increase of RMB181 million compared to the balance of RMB8.963 billion as at 31 December 2007. The balance of the short-term borrowings as well as the current portion of long-term borrowings amounted to RMB1.226 billion, representing an increase of RMB238 million compared to the balance of RMB988 million as at 31 December 2007.

VI. Significant Investment

For the six months ended 30 June 2008, the Group had no new significant investment.

VII. Material Acquisition and Disposal

For the six months ended 30 June 2008, the Group did not have any material acquisition and disposal.

VIII. Exchange Rate Risks

The business operations of the Group are affected by changes in the exchange rate of Renminbi as the Group accepts the United States dollar payments for most of its export sales, with liabilities denominated in foreign currencies, including Japanese Yen and the United States dollar. At the same time, the Group also has to make payments for equipment and spare parts imported in foreign currencies, and in most cases, in the United States dollar. Therefore exchange rate fluctuation of foreign currencies vs. RMB may have favorable or adverse impact on the operating results of the Group. The appreciation of Renminbi will lead to a decline in the revenue derived by the Group from exports, but will also lower the cost of equipment and spare parts imported by the Group, as well as lowering the costs for the repayment of foreign debts.

IX. Commodity Price Risks

The Group is also subject to commodity price risks arising from movements in the prices of its products and materials.

X. Industry Risks

Like other coal companies and coking companies in China, the Group's operational activities are subject to regulations by the Chinese government in aspects such as industry policies, project approval, granting of permits, industry special tax and levy, environmental protection and safety standards. Therefore the Group may be restricted in expanding business or increasing earnings. Future policies adopted by the Chinese government in industries relevant to the Group's businesses such as coal and chemical may have an impact on the Group's operations.

XI. Contingent Liabilities

1. Bank guarantees

For the six months ended 30 June 2008, the Group did not have any guarantee in favor of third parties.

2. Environmental protection responsibilities

Environmental protection laws and regulations are in full force in China. However, the management of the Group is of the opinion that other than that accounted for in the financial statements, there does not currently exist any other liability in relation to environmental protection that may have major negative impact on the financial position of the Group.

3. Contingent legal liability

As at 30 June 2008, the Group was not involved in any material litigation or arbitration, and as far as the Group is aware, there is no material litigation or claim pending or threatened against the Group.

I. COAL OPERATIONS

In the first half of 2008, the Company seized the opportunity of strong demand in the coal market, fully leveraged its advantages in production capacity, reasonably organized production and strengthened the coordination among production, transportation and sales. Coal production and sales volume increased rapidly while prices of coal continued to hover at high levels. The Group's coal operations have achieved satisfactory performance.

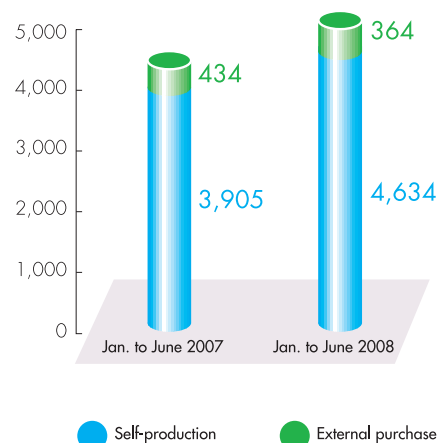

1. Coal production operations

(1) Production of raw coal continued to maintain relatively fast growth

In the first half of 2008, the Company's raw coal production was 49.98 million tons, representing an increase of 6.59 million tons or 15.2% over the same period last year. Production of self-produced raw coal was 46.34 million tons, representing an increase of 7.29 million tons or 18.7% over the same period last year; accounted for 92.7% of the Company's raw coal production, representing an increase of 2.7 percentage points over the same period last year.

Unit: 10 thousand tons

(2) *Effective control of production cost*

In the first half of 2008, the unit production cost of self-produced raw coal was RMB94.97/ton, representing an increase of RMB5.88/ton over the same period last year. Unit cost for sales of self-produced commercial coal was RMB277.01/ton, representing an increase of RMB43.79/ton over the same period last year. If the impact of policy-related cost increase such as Coal Sustainable Development Fund levied by the Shanxi Province were excluded, the cost of raw coal would have increased by RMB2.87/ton showing remarkable results achieved in cost control. The increase in the cost of self-produced commercial coal was mainly attributable to an increase in external purchase of coal for washing purpose and a rise in the prices of feed coal for washing plants.

2. Coal sales operations

In the first half of 2008, by actively implementing the State's policy of ensuring the supply of thermal coal, the Company seized the favorable opportunity of long-standing high prices in the spot market and increased the proportion of spot sales to an appropriate extent in the additional output, which significantly enhanced the profitability of coal operations.

(1) *Continued optimization of sales structure*

In the first half of 2008, the Company's coal sales amounted to 46.01 million tons, representing an increase of 4.34 million tons or 10.4% over the same period last year, of which domestic sales were 37.07 million tons, accounting for 80.5% of the total sales; export sales were 8.92 million tons, accounting for 19.4% of the total sales; and import sales were 20,000 tons.

Sales of self-produced commercial coal amounted to 38.15 million tons, representing an increase of 4.33 million tons or 12.8% over the same period last year, and accounted for 82.9% of the total sales of coal, representing an increase of 1.7 percentage points over the same period last year. Proprietary coal trading and export agency sales amounted to 7.86 million tons, representing 17.1% of the total sales, down 1.7 percentage points over the same period last year.

(2) Notable increase in the proportion of spot sales

In the first half of 2008, spot sales of coal amounted to 11.22 million tons, representing an increase of 5.34 million tons or 90.8% over the same period last year, accounting for 24.4% of the total sales of coal, representing an increase of 10.3 percentage points over the same period last year.

(3) Sustained high coal prices

In the first half of 2008, average coal selling price of the Company's was RMB455/ton, representing an increase of RMB114/ton or 33.6% over the same period last year, of which the domestic average price of self-produced thermal coal was RMB407/ton, representing an increase of RMB79/ton or 24.1% over the same period last year; domestic average price of self-produced coking coal was RMB870/ton, representing an increase of RMB243/ton or 38.8% over the same period last year; average export price of self-produced thermal coal was RMB672/ton, representing an increase of RMB207/ton or 44.5% over the same period last year; average export price of self-produced coking coal was RMB1,938/ton, representing an increase of RMB1,146/ton or 144.7% over the same period last year.

The average selling price of long-term contract of self-produced thermal coal was RMB394/ton, representing an increase of RMB51/ton or 14.9% over the same period last year; the average price of spot sales was RMB596/ton.

3. Production and sales of independent coal washing plants increased

In the first half of 2008, external purchases of raw coal by the Company's three independent coal washing plants amounted to 3.27 million tons, representing an increase of 31.9% over the same period last year.

Commercial coal production of independent coal washing plants amounted to 2.82 million tons, representing an increase of 42.4% over the same period last year; sales volume amounted to 2.42 million tons, representing an increase of 16.9% over the same period last year. Cost of coal sales per ton was RMB337.59, representing an increase of 34.5% over the same period last year. Gross profit margin was 25.2%, representing an increase of 2.8 percentage points over the same period last year.

4. Increased scale in proprietary coal trading

In the first half of 2008, the Company achieved proprietary coal trading of 2.28 million tons, representing an increase of 1.05 million tons or 85.4% over the same period last year. Cost of coal sales per ton was RMB575, representing an increase of 63.9% over the same period last year. Sales price of coal per ton was RMB597, representing an increase of 41.7% over the same period last year. Gross profit margin was 3.6%.

II. COKING OPERATIONS

In the first half of 2008, the Company fully leveraged the production capacity for coke, the scale of production and sales continued to expand, and the average sales price of coke increased substantially, achieving doubled growth of operating results.

1. Continued increase in production and sales

In the first half of 2008, the production of coke reached 2.21 million tons, representing an increase of 40.8% over the same period last year.

Sales of coke amounted to 2.04 million tons in aggregate, representing an increase of 150,000 tons or 7.9% over the same period last year, of which sales of self-produced coke amounted to 1.67 million tons, accounting for 81.8% of total sales, and representing an increase of 10.4 percentage points over the same period last year.

2. A substantial increase in coke price

In the first half of 2008, the Company's coke price continued to rise at a rate higher than that for the same period of last year. The average sales price of coke was RMB2,102/ton, representing an increase of 97.4% over the same period last year, of which the average domestic sales price of coke was RMB1,889/ton, representing an increase of 99.9% over the same period last year; the average export price was RMB3,067/ton, representing an increase of 117.7% over the same period last year. Domestic sales price of self-produced coke was RMB1,885/ton, representing an increase of 101.8% over the same period last year. Export sales price was RMB2,873/ton.

III. COAL MINING EQUIPMENT OPERATIONS

In the first half of 2008, the Company made great efforts in exploring new markets. Through sales of major equipments, the Company increased its market shares, drove the sales of components of coal mining equipment and strived to add value to the products. Rapid progress was made in the research and development of new products as well as scale expansion.

1. Expansion of both production and sales

In the first half of 2008, an aggregate of 114,000 tons of coal mining equipment was produced, representing an increase of 17,000 tons or 17.5% over the same period last year. There were 8,145 units (sets) of major coal mining equipment produced. Sales amounted to 108,000 tons, representing an increase of 6,000 tons or 5.9% over the same period last year.

2. A significant increase in newly signed contracts

In the first half of 2008, newly signed sales contracts amounted to RMB3.02 billion in aggregate, representing an increase of 58.4% over the same period last year, of which sales contracts with manufacturing enterprises amounted to RMB2.88 billion, representing an increase of 58.3% over the same period last year.

IV. DESIGN OF COAL MINES AND OTHER OPERATIONS

In the first half of 2008, the group newly entered into 152 contracts for businesses like prospecting design of coal mines, undertaking projects as general contractor, construction supervision and rock soil projects with an aggregated contract value of RMB610 million. The production volume of primary aluminum was 50,000 tons. Electricity generated was 1.06 billion kwh.

The Company has been placing great emphasis on investor relations management and regards maintaining investor relations as the activity of sustainable strategic management behaviour.

In the year of 2008, the global economy has been experiencing rapid changes. The spreading of the US subprime mortgage crisis, the continued depreciation of the US dollar, the persistent rise in international oil and foodstuffs prices as well as worldwide inflation and economic slowdown have had adverse impacts on the economy of China. Given the structural conflicts that have accumulated for a long period of time during economic development and increasing uncertainties, severe challenges have posed difficulties for reaching the goals of macro-economic control of maintaining stable and faster economy development and controlling the rapid rise of prices. The stock market, which acts as a “weatherglass” reflecting the economic trend, has experienced continuous depression. Affected by the international as well as domestic capital markets, the Hong Kong stock market declined substantially in the first half of 2008. The Hang Seng China Enterprises Index dropped from 16,091.15 points to 11,909.75 points, representing a decrease of 26.0%. During the same period, the A share market declined drastically, the SSE Composite Index dropped from 5,261.56 points to 2,736.10 points, representing a decrease of 48% in aggregate.

The significant fluctuations in the capital market have created huge pressure on the Company in the aspect of investor relations management. The Company has been actively tackling changes in the external environment and conducted detailed analyses and studies on investor relations management. The Company also formulated the working plan for 2008 with pertinence to guide the implementation of investor relations management.

Organizing A share IPO road shows successfully. The IPO of A shares of the Company was implemented when major global stock markets saw a general crash due to the aggravating US subprime mortgage crisis. Between 19 and 21 January 2008, three teams formed by the management of the Company conducted 3 days’ pre-marketing and formal road shows in Shanghai, Beijing, Shenzhen and Guangzhou. The management of the Company convened 27 meetings and met 117 institutional investors, receiving wide and positive market responses. On 1 February 2008, China Coal Energy was successfully listed on the Shanghai Stock Exchange.

Organizing activities of results announcement and road shows. In April 2008, the A+H results announcement and road show activities of the Company for 2007 were held respectively in Hong Kong, Shanghai and Beijing. By communicating with 311 fund managers and analysts from all over the world through various means such as organizing results announcements, investor luncheons and one-on-one interviews, China Coal Energy displayed its remarkable results for 2007 and bright prospects for future development. Following the announcement of results, leading domestic and overseas investment banks such as Morgan Stanley, Citibank and CICC all issued positive and affirmative research reports.

Conducting the first reverse road show for A share investors. At the end of April 2008, the Company successfully conducted a reverse road show for A share investors. 73 fund managers and analysts from 60 domestic investment institutions visited Antaibao Open Pit Mine, Anjialing Open Pit Mine, Anjialing Underground Mine, coal processing plants and Daqin railway loading stations, thus strengthening their understanding and awareness about the Company’s current production and operation status, business operations and future development strategies. As a result, the confidence of mass institutional investors to the Company was enhanced.

The convening of the annual general meeting of the Company. The 2007 annual general meeting was held at Crowne Plaza Park View Wuzhou Beijing on 20 June 2008. The meeting considered and approved ten resolutions including the acquisition of Dongpo Coal Mine. The management of the Company made open and frank communication with representatives of shareholders.

Actively participating in various investment forums. In the first half of 2008, the Company participated in ten investment forums of various types organized by Morgan Stanley, J.P. Morgan Chase, Credit Lyonnais and CICC, etc., made eight presentations at meetings, conducted 39 one-on-one and one-to-many interviews and communicated face to face with 987 fund managers.

Meeting with investors and corresponding to phone call inquires on a daily basis. In the first half of 2008, the management team together with the staff of Investor Relations Department of the Company received 144 H share investors in 83 groups and 16 A share investors in 8 groups who paid visits or made phone calls. With the help of the investor relations column on the Company's web site and the investor hotline, the latest information on developments of the Company was delivered in a timely manner and questions which investors were concerned about were answered with patience and in detail.

Fully capitalizing on mainstream media to enhance the Company's reputation. The Company emphasizes the organic integration between investor relations and public relations. In the first half of 2008, the Company was interviewed by five domestic mainstream media, including China Securities Journal. Arrangements were also made for interviews by HK-TVB "Finance Magazine" Column and South China Morning Post, Hong Kong and on-site shooting in Pingshuo Mining Area, which effectively enhanced the Company's reputation.

In 2008, facing challenges from overseas as well as domestic capital markets, the Company will strive to further strengthen communication with overseas and domestic investors so as to promote investors' recognition of the Company, increase the market value of the Company and maximize the benefits of shareholders.

I. Corporate Governance

During the reporting period, by vigorously implementing overseas and domestic laws and regulations and listing rules, the Company further improved its corporate governance structure and continuously promoted its corporate governance standard. In making significant decisions on major issues and managing the day-to-day operation of the Company, the Company's governing bodies, decision-making bodies, supervisory body and the corporate management duly discharged their respective duties and responsibilities, supported, checked and balanced against each other, made continued efforts in promoting the interests of the Company and shareholders' values, all in accordance with the prescribed responsibilities and functions of the Shareholders' General Meeting, the Board of Directors, the Supervisory Committee and the corporate management.

XI. Management of Connected Transactions

To fully protect the interests of medium and minority shareholders, the Company entered into a "Non-competition agreement" with China National Coal Group Corporation to set up a strategic mechanism to avoid conflict of interests. At the same time, the Company also entered into nine Framework Agreements for Continuing Connected Transaction. The Company also formulated the "Management Measures on Connected Transactions of China Coal Energy Company Limited" to set up detailed procedures and requirements for the review, decision-making, implementation and management of connected transactions. The Company established a team directly led by the Board Secretary to manage the connected transactions; all affiliates also established corresponding internal bodies to manage their respective connected transactions, creating an effective connected transaction management and control mechanism.

During the reporting period, the Company further strengthened connected transaction management, strictly observed the various agreements signed with the connected parties and managed connected transactions in accordance with the requirements of the listing rules the Hong Kong Stock Exchange and the Shanghai Stock Exchange and the "Management Measures on Connected Transactions of China Coal Energy Company Limited".

The Company continued to improve its management over continuing connected transactions and ensure cap for each type of continuing connected transaction was not exceeded. First, the Company and its all units were required to review the necessity and rationality of each proposed continuing connected transaction. All necessary continuing connected transactions were performed, priced, and conducted by the Company in strict compliance with the framework agreements signed with the connected parties at the time of listing, in accordance with the price determination principles and on an arm's length basis. Secondly, the gross value of continuing connected transactions were controlled and budgeted in advance, through which budgeted values of the continuing connected transactions of all affiliates of the Company for the full year were established. A monthly reporting system and an early alarming system were implemented for each type of continuing connected transactions budgeted. All affiliates contemplating an unbudgeted continuing connected transaction must report such transaction to the connected transaction management team prior to its occurrence, whereupon the internal control and approval procedure and the information disclosure procedure of the Company will be followed after consideration and approval by the connected transaction management team.

Through optimizing the organizational structure and strategic staffing, as well as the adoption of various other management and control measures, the Company further improved the connected transaction management and control system, enhanced internal control and ensured its compliance with legal and regulatory requirements for all connected transactions during the reporting period.

In July 2008, the Company acquired 100% shareholding of Dongpo Coal and 5% shareholding of China National Coal Industry Qinhuangdao Import and Export Co., Ltd. ("Qinhuangdao Co.") from wholly-owned subsidiaries of China Coal Group, constituting connected transactions of the Company, the details of which are set out in the section "Assets Acquisition" of this report.

TO BOARD OF DIRECTORS OF CHINA COAL ENERGY COMPANY LIMITED

(Incorporated in the People's Republic of China with limited liability)

Introduction

We have reviewed the interim financial information set out on pages 46 to 81, which comprises the condensed consolidated balance sheet of China Coal Energy Company Limited (the "Company") and its subsidiaries (together, the "Group") as at 30 June 2008 and the related condensed consolidated income statement, changes in equity and cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Rules Governing the Listing of Securities on the Main Board of The Stock Exchange of Hong Kong Limited requires the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 "Interim Financial Reporting". The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with International Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on this interim financial information based on our review and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

1 ORGANISATION AND PRINCIPAL ACTIVITIES

China Coal Energy Company Limited (the "Company") was established in the People's Republic of China (the "PRC") on 22 August 2006 as a joint stock company with limited liability under the Company Law of the PRC as a result of a group restructuring of China National Coal Group Corporation ("China Coal Group" or the "Parent Company"). The Company and its subsidiaries (collectively the "Group") is principally engaged in mining and processing of coal, sales of coal and coke products and manufacturing and sales of coal mining machinery. The address of the Company's registered office is 1 Huang Si Da Jie, Chaoyang District, Beijing, the PRC.

The H shares of the Company were listed on the Main Board of The Stock Exchange of Hong Kong Limited in December 2006, and the A shares of the Company were listed on the Shanghai Stock Exchange in February 2008.

2 BASIS OF PRESENTATION

- (a) This condensed consolidated interim financial information for the six months ended 30 June 2008 has been prepared in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting". The condensed consolidated interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2007, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

2 BASIS OF PRESENTATION (continued)

- (c) The assumption of control or joint control of certain subsidiaries and a jointly-controlled entity and an acquisition of a new subsidiary in the six months ended 30 June 2007

Effective from 1 January 2007, the Company obtained effective control over certain formerly jointly-controlled entities, and as such the entities became subsidiaries of the Company. Accordingly, those entities, which were previously proportionately consolidated, were fully consolidated in the Group's consolidated financial statements, from 1 January 2007.

Effective from 1 January 2007, the Company obtained joint control over a former associate. This entity, which was previously accounted for using the equity method of accounting in the Group's consolidated financial statements, was proportionately consolidated in the Group's consolidated financial statements, from 1 January 2007.

In the condensed consolidated balance sheet of the Group as at 30 June 2007, the assets and liabilities of the above mentioned subsidiaries and the jointly-controlled entity were reflected at their provisional fair values on 1 January 2007 based on the management's best estimate. Such assets and liabilities were valued by two qualified valuers in late 2007 and in the consolidated balance sheet of the Group as at 31 December 2007, they were adjusted to final fair value based on the issued valuation reports. The comparative equity movement for the six months ended 30 June 2007 in this condensed consolidated interim financial information has been presented as if the final accounting for the combination had been completed from 1 January 2007.

In addition, on 6 April 2007, the Group acquired 50% of the enlarged shares of Fushun Coal Mining Motor Manufacturing Company Limited ("Fushun Motor"), for a total consideration of RMB158,000,000. As the Group was able to govern the financial and operating policies of Fushun Motor, it is accounted for as a subsidiary of the Group.

3 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies adopted are consistent with those applied in the annual financial statements for the year ended 31 December 2007, as described in the annual financial statements for the year ended 31 December 2007.

There are no standards, interpretations or amendments to published standard or interpretations that are mandatory for the first time for the financial year beginning 1 January 2008 and are relevant to the operations of the Group.

The new standards, interpretations or amendments to published standards or interpretations that have been issued but are not effective for the financial year beginning 1 January 2008 have not been early adopted by the Group.

4 REVENUE AND SEGMENT INFORMATION

(a) Primary reporting format – business segments

The Group organizes its business into four main business segments:

- Coal - Production and sales of coal;
- Coke - Production and sales of coke;
- Machinery - Manufacturing and sales of mining machinery; and
- Others, including design of mining structures, trading of other products, generation and sales of electric power, production and sale of primary aluminum, transportation services and agency services. None of these constitutes a separately reportable segment.

10 DERIVATIVE FINANCIAL INSTRUMENTS AND OTHER FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (continued)

Notes:

- (a) Derivative financial instruments represent forward foreign exchange contracts held by the Company. The Company raised a net listing proceeds of approximately HKD14.5 billion through its initial public offering in The Stock Exchange of Hong Kong Limited in December 2006. In early 2007, in order to manage the foreign exchange risk related to its bank deposit denominated in HKD, management entered into several forward foreign exchange contracts with various banks in the PRC, which enable the Company to exchange certain amount of HKD deposit into RMB at a fixed rate at the maturity date. The total original notional principal amount under the contract amounted to approximately HKD10.1 billion, and the maturity period ranges from 6 months to 12 months from the contracting date. At 31 December 2007, the total notional principal amount under the contract was approximately HKD6.6 billion and they have been all due and settled in January 2008. The Company accounted for those contracts as derivative financial instruments since the date of the transaction, and the gain from the fair value changes of the contracts are recorded as an offsetting item of finance costs (Note 19) in the income statement.
- (b) Other financial assets at fair value through profit or loss mainly represent the Company's investment in listed securities in the PRC. In May 2007, the Company subscribed for 40 million shares, as a strategic investor, of China COSCO Holdings Company Limited ("COSCO") prior to COSCO's A share public offering, at the cost of RMB8.48 per share and the total cost of approximately RMB339,200,000. According to the subscription agreement, there is a lock-up period starting from COSCO listing date on Shanghai Stock Exchange for the Company to sell those shares. The Company designated the investment as financial assets at fair value through profit or loss at the date of the transaction, and the change in the fair value of the shares are recorded in the income statement. As at 30 June 2008, the market price for the share was RMB19.75 per share (28 December 2007, being the last trading date of A shares in 2007: RMB42.66 per share), and the change in the fair value of the investment during the six months ended 30 June 2008 has been recorded as a loss in the condensed consolidated income statement for the period.

At 30 June 2008	9,152,000	4,106,663	13,258,663

Notes:

- (a) On 1 February 2008, the Company issued 1,525,333,400 new A shares at RMB16.83 per share. Net proceeds resulting from such share issuance amounted to approximately RMB25,319,910,000 after deducting the share issuance costs, out of which RMB1,525,333,000 was recorded in share capital and RMB23,794,577,000 was recorded in capital reserve. The listing and trading of the A shares on the Shanghai Stock Exchange commenced on 1 February 2008.
- (b) The domestic shares rank pari passu, in all material respects, with the H shares. However, the transfer of the domestic shares held by China Coal Group is subject to certain restrictions imposed by the PRC law from time to time.

Current income tax		
– PRC enterprise income tax (note (a))	1,520,566	526,899
– Overseas taxation (note (b))	15,008	2,468
Deferred income tax (Note 14)	(13,128)	225,573
	1,522,446	754,940

Notes:

- (a) The National People's Congress of the PRC approved the Unified Corporate Income Tax Law ("CIT" Law) on 16 March 2007. Effective from 1 January 2008, the tax rate applicable to the Group is 25%, with certain grandfathering provisions and preferential provisions. The change in the carrying amount of the deferred tax assets and liabilities, as a result of the change in tax rate, has been reflected in the interim financial information of the Group for the six months ended 30 June 2007.

The provision for PRC corporate income tax is calculated based on the statutory income tax rate of 25% (2007: 33%) of the assessable income of each of the companies now comprising the Group determined in accordance with the relevant PRC income tax rules and regulations, except for certain subsidiaries and jointly-controlled entities which are taxed at preferential tax rates ranging from 0% to 15% (2007: 0% to 30%) based on the PRC CIT Law, grandfathering provisions and preferential provisions.

- (b) Taxation on overseas profits has been calculated on the estimated assessable profit for the period at the tax rates prevailing in the countries in which the Group operates.

22 EARNINGS PER SHARE

Basic earnings per share for the six months ended 30 June 2008 is calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of approximately 12,998,854,000 ordinary shares in issue during the period.

Basic earnings per share for the six months ended 30 June 2007 is calculated by dividing the profit attributable to equity holders of the Company by 11,733,330,000 ordinary shares during the period.

As the Company had no dilutive instruments for the six months ended 30 June 2008 and 2007, diluted earnings per share equals basic earnings per share.

27 SIGNIFICANT RELATED PARTY TRANSACTIONS

China Coal Group, the immediate parent of the Company, is controlled by the PRC government. The PRC government is the Company's ultimate controlling party. In accordance with IAS 24 (revised 2003), "Related Party Disclosures", enterprises directly or indirectly controlled by the PRC government ("state-owned enterprises") and their subsidiaries, together with China Coal Group companies, are all related parties of the Group. Neither China Coal Group nor the PRC government publishes financial statements available for public use.

The Group has extensive transactions with China Coal Group and other state-owned enterprises. For the purpose of disclosures of related party transactions, to the extent possible, the Group has in place procedures to assist the identification of the immediate ownership structure of its customers and suppliers as to whether they are state-owned enterprises. Many state-owned enterprises have multi-layered corporate structures and the ownership structures change over time as a result of transfers or privatization programs. However, management believes that all material related party transactions and balances, of which it is aware, have been adequately disclosed.

Sales of goods and provision of services to state-owned enterprises are at state-prescribed prices or prices which are also available to other customers. The Group considers that these sales are activities in the ordinary course of business.

Set out below is a summary of significant related party transactions in the six months ended 30 June 2008 and 2007 and balances as at 30 June 2008 and 31 December 2007 respectively.

27 SIGNIFICANT RELATED PARTY TRANSACTIONS (continued)

(a) Related party transactions (continued)

In addition, Jiangsu Sulv Aluminum Company Limited ("Sulv Aluminum") was transferred to China Coal Group in October 2007, which caused the transaction between the Group and Sulv Aluminum to constitute related party transactions. In the six months ended 30 June 2008, the Group sold aluminum ingots to Sulv Aluminum with a total amount of RMB102,476,000 (period from the date of the transfer to 31 December 2007: RMB43,282,000). Because such transaction was under an agreement signed before Sulv Aluminum became a connected party of the Group, the management of the Company believe it should not be included in the annual cap of connected party transactions. The Company has made an announcement in accordance with the requirements of the Hong Kong Listing Rules and performed the reporting and disclosure obligations.

- (i) Under PRC law and regulations, coal exports shall only be made through one of four authorized PRC enterprises including China Coal Group. The Company appointed China Coal Group as its coal export sales agent under a Coal Export and Sales Agency Framework Agreement entered into on 5 September 2006. Pursuant to the agreement, the agency fee for coal exports to countries and territories other than the Taiwan market is 0.7% of the FOB price in respect of each ton of coal products exported; and the agency fee for the coal exports and sales to the Taiwan market is 0.7% of the FOB price, plus USD0.5 per ton of coal products sold. The agency fees are payable on a monthly basis, effective from 22 August 2006.
- (ii) The Company and China Coal Group entered into Integrated Materials and Services Mutual Provision Framework Agreement on 5 September 2006, under which the Company provides to China Coal Group and China Coal Group provides to the Company production material supplies and ancillary services, and the Company also provides to China Coal Group export-related services.
- (iii) The Company and China Coal Group entered into a Mine Construction and Design Framework Agreement on 5 September 2006, under which the Company provides coal mine design services to China Coal Group and China Coal Group provides construction services to the Company.
- (iv) The Company and China Coal Group entered into a Property Leasing Framework Agreement on 5 September 2006, under which the Company leases from China Coal Group certain buildings and properties in the PRC for general business and ancillary purposes.
- (v) The Company and China Coal Group entered into a Land Use Rights Leasing Framework Agreement on 5 September 2006, under which the Company leases certain land use rights in the PRC from China Coal Group for general business and ancillary purposes.
